Press Release

New England Construction Begins Construction On Heartlab In Westerly, RI

Westerly, RI (August 25, 2004): New England Construction announced today that it will begin an expansion project on Heartlab Cardiac Solutions of Westerly, Rhode Island. The expansion will increase the building size by 24,000 square feet, allowing the total footprint to be 39,000 square feet.

New England Construction designed and built the original building in 2000. The new project will add a new canopy and metal panel monolith to allow the expansion to blend with the original construction. The expansion will be used for further research and production space as well as new offices and storage.

Heartlab Cardiac Solutions, founded in 1994, specializes in the development of cardiac imaging software and the integration of cardiac imaging network systems. Today, Heartlab's base includes many of the nation's leading heart centers as well as numerous regional and community hospitals.
